

Info 6150 Final Project

LOGITO

- Adhyantini Bogawat - 002766612
- Arpit Jain - 002771928
- Divya Gadge - 002792525
- Swarag Gutte - 002728422

Purpose

- There are numerous projects that project managers must monitor.
- Keeping track of the status of these projects is vital to help deliver the projects on time to the clients and also keep track of projects in backlog
- Logito helps provide a consolidated view of all projects to help project managers stay on top of things

Features

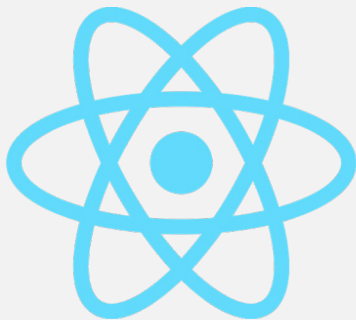

- Login functionality for Admin and Employee
- Authentication
- Email notification to the employee regarding onboarding into the company
- CRUD operations for the employee on Projects
- View project statistics
- Download Project statistics
- Calendar View of deadlines for projects that are incomplete or in standby status
- View Project summary
- User friendly application

API's Implemented

- Nodemailer for sending emails
- Recharts for project statistics visualisations
- FullCalendar for Calendar View
- JWT for authentication and authorisation
- Bcrypt for hashing passwords
- Axios for API calls
- Mongoose and MongoDB database
- Toastify for toast messages
- Upload employee profile picture in Cloudinary
